

Commissioner and Advisory Delegate Video Summary Business Regarding Special Committees

Kerry Rice, Deputy Stated Clerk of the General Assembly

During conversations regarding the referral of business, the reports of Special Committees emerged as items that may require unique consideration. These reports were received months ago in response to work that had been established by the past General Assembly. However, with the changing landscape of COVID-19, it became clear that Special Committees and the impact of their work on the church would benefit from additional time. As a result, Special Committees have been recommended to continue their work virtually, or without additional meeting budgets, with new reports submitted to the 225th General Assembly (2022). The only significant change to the task of these committees is that of the Moving Forward Implementation Commissions which will move from a commission empowered to act on its decisions to a committee that will report recommendations to the 225th General Assembly (2020) to consider.
